

Test. Tinker. Transform. Shape the Future of Learning with AI.

AI Tool Design Intern

What You'll Do:

You'll experiment with the newest AI tools—discovering what works, what doesn't, and how teachers and students can use them ethically and effectively.

Skills You Will Need:

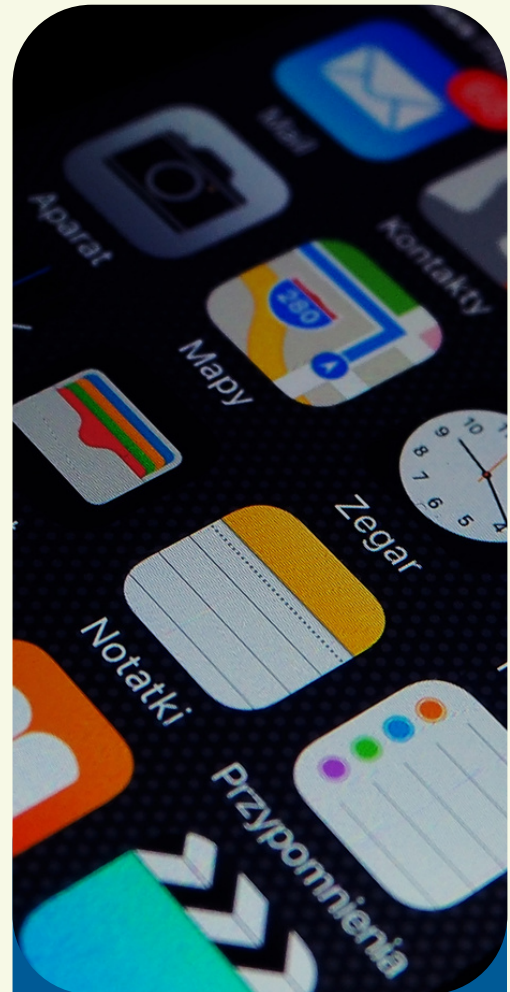

- Analytical thinking and detail orientation
- Testing and documentation
- Familiarity with AI tools or a desire to learn
- Clear and concise reporting
- Consistent follow-through and curiosity

What You'll Gain:

- Early experience in AI educational technology exploration
- Insight into product testing and user-experience design

Ideal for

Tech-savvy problem solvers who love trying new tools, analyzing what works, and improving real-world systems.
